

International Journal of Chemical Engineering and Applications

CONTENTS

Volume 11, Number 1, February 2020

- **Materials and Energy Chemistry**

Modified Carbon Nanotubes for Improvement of Biosensor Electrodes.....1
Thirawudh Pongprayoon and Hsiao-Chen Liu

Synthesis and Characteristics of Al-containing ZSM-58 Zeolite Membrane for CO₂ Separation6
E. Hayakawa and S. Himeno

Dye Sensitized Solar Cell (DSSC) by Using a Natural Pigment from Microalgae14
A. Orona-Navar, I. Aguilar-Hernández, T. López-Luke, Adriana Pacheco, and N. Ornelas-Soto

- **Environmental Chemical Engineering**

CO₂ Absorption and Mass Transfer in Film Flow on a Rotating Disc.....18
MD S. Miah, Mohammad S. Hossain, Abid A. Khan, Muhammad A. Ashraf, and Zoubir Zouaoui

Prototyping a Microfluidic Sensor for Real-Time Detection of Airborne Formaldehyde23
Daniel Măriuța, Lucien Baldas, Stéphane Colin, Stéphane Le Calvé, Jan G. Korvink, and Jürgen J. Brandner

- **Chemical Industry**

Study of Zirconium and Ammonium Perchlorate Based Igniter for Composite Solid Base Bleed Propellant29
Amir Mukhtar, Habib Nasir, and Badar Rashid

Microwave-Mediated Synthesis of N-allyl/Propargyl Derivatives: Enzymatic Analysis as a Potential Factor Xa (FXa) Inhibitor, Theoretical and Computational Molecular Docking34
Fabián Santana-Romo, Yorley Duarte, Francisco Castillo, Miguel A. Maestro, and Flavia C. Zacconi

Prediction of Failure Rate in Long Distance Oil and Gas Pipelines Using Soft Computing Techniques42
Tahyr Garlyyev, Srinivasa Rao Pedapati, and K Venkateswara Rao
