Premrudee Kanchanapiya is a Ph.D. graduated from graduate School of Natural Science & Technology, Division of Global Environmental SCI. and Engineering, Kanazawa University, Japan in 2005. She has worked as a researcher at National Metal and Materials Technology Center, Thailand. Her main research interests are in waste management and utilization, emerging pollutant monitoring/treatment and life cycle assessment.

Benjawan Nilyok is a graduate student in Advanced and Sustainable Environmental Engineering Program (EnvE). She received a scholarship from TAIST-Tokyo Tech. She is a graduate student at Sirindhorn International Institute of Technology (SIIT), Thammasat University. Her research interests include emerging pollutant monitoring and health risk assessment.

Supachai Songngam graduated from master of science in petrochemical and polymer science, Chulalongkorn University. He has worked as laboratory officer at National Metal and Materials Technology Center, Thailand. His has expertise in GC-MS and LC-MS analysis techniques.

Sun Olapiriyakul is an assistant professor of Industrial Engineering Program, School of Manufacturing Systems and Mechanical Engineering (MSME) at Sirindhorn International Institute of Technology (SIIT), Thammasat University. His fields of specialization are sustainability, supply chain management, life-cycle engineering and applied operations research.
