

those with blood type AB, with a risk ratio of 0.918. There is no statistically significant difference in the risk of developing lung cancer among individuals with other blood types. Therefore, it is recommended that individuals with blood type AB pay attention to the risk of developing lung cancer and undergo regular check-ups at the hospital.

CONFLICT OF INTEREST

The author declare that he has no competing interests.

AUTHOR CONTRIBUTIONS

The author of this manuscript is Yi-Horng Lai and Fen-Fen Huang. The author has made substantial contributions to the conception and design, acquisition, analysis and interpretation of data, and he was involved in drafting the manuscript. The author read and approved the final manuscript.

FUNDING

Publication costs are not funded by any organization.
